

## BoXo Classic

### BoXo Classic

The original BoXo Classic is a special enclosure for creating a multitude of possible adapter, splitters and distributors. The front panel cavities and incorporated M3 windings can be assembled and combined in an infinite number of configurations, which can be changed easily on demand.

The D-type cavities are configured in a way that allows the assembly of sockets on both sides of the front panels.

The assembly kit contains the necessary case screws.

#### TECHNICAL DETAILS

Dimension: approx. 100x70x40 ( LxWxH in mm )

Colour: black

Wight: 190g

Assembly-set screws included

Technical details are subject to change without prior notice.
